NOTES ON THE DATA

- Charts, best days, streaks and awards use only automatically synced steps on challenge days. Manual adjustments are one-off top-ups, not real days.
- Distance is an estimate based on an average step length of 0.75 m.
- The leaderboard shows the active room members (37). One participant left the room before the end and is not on the leaderboard.
- Step counts depend on phone or watch sync. A day without a sync shows as 0.
- Data as of 02/02/2026 (ViedME database).

Thank you

Thank you to everyone who took part, and to the organisers for their trust. See you at the next challenge.
